

100% NATURAL ORGANIC FERTILIZER

100% NATURAL ORGANIC FERTILIZER

# Nutri-Rich

## 8-2-4

### Environmentally Friendly – High Performance – Low Impact

100% Natural Organic Fertilizer – Nutri-Rich offers the most natural source of essential nutrients to promote vigorous plant growth, bountiful yields and brilliant flowering. Nutri-Rich is completely natural and contains no synthetic ingredients. Used as directed, Nutri-Rich will not impact or harm ground waters or other sensitive ecosystems. In fact, regular use of Nutri-Rich will not only build up and enrich soil but also benefit the plant and soil biosphere.

### Gradual and Steady Release of Nutrients

Nutri-Rich is formulated with a broad spectrum of nutrients that slowly release as a plant needs them. The result is a longer lasting green, a stronger and robust shoot and root system, and flowering and fruiting beyond compare.

### Exceptional Quality, Consistency, & Confidence

Nutri-Rich is processed with quality and consistency in mind. Formulated into a uniform pellet and granule, every piece of Nutri-Rich contains the same nutrients necessary for optimum plant nutrition. Many synthetic fertilizers are blended from multiple ingredients supplied by multiple manufacturers. You can have confidence that Nutri-Rich only contains the most natural plant food that Mother Nature ever intended.

### Easy to Use

While some meal form fertilizers offer similar individual nutrient values, applying the material may be prohibitive because of special equipment requirements. Nutri-Rich is the next generation in natural 100% organic fertilizers and can easily be applied with any conventional fertilizer spreader. Nutri-Rich will evenly broadcast for complete coverage on turf or garden plots. The density and sizing allow for each particle to immediately settle into the soil and begin feeding your plants the moment your broadcasting is complete.

### Minimum Guaranteed Analysis

Total Nitrogen (N): .....	8%
1% Water Soluble Organic Nitrogen	
7% Water Insoluble Organic Nitrogen	
Available Phosphate (P2O5) .....	2%
Soluble Potash (K2O) .....	4%

Derived from: Dried Poultry Waste, Blood Meal, Feather Meal, Sulfate of Potash.

100% NATURAL ORGANIC FERTILIZER

# Nutri-Rich 8-2-4

## Granular & Pellet Fertilizer Application Recommendations

100% NATURAL ORGANIC FERTILIZER

### Vegetable Gardens

- **Broadcasting:** For each 100 sq. ft. of garden area, till or rake in 4 - 6 lbs. of Nutri-Rich fertilizer prior to planting. After planting, top dress seed rows or plants with a thin layer (1/2 lb. per 10 foot furrow) of Nutri-Rich fertilizer.
- **Row Crops:** For every 10 foot furrow till or rake in 1/2 - 1 lb. of Nutri-Rich fertilizer to a depth of 2-4 inches. Cover furrow with a thin layer of soil and plant vegetable seeds at the recommended depth. After planting, top dress seed rows or plants with a thin layer (1/2 lb. per 10 foot furrow or 1/8 cup around base of plant) of Nutri-Rich fertilizer.
- For enhanced yields, 4-5 weeks prior to harvest, top dress plants again with a thin layer (1/2 lb. per 10 foot furrow) of Nutri-Rich.
- **After any application of Nutri-Rich for your vegetable garden, be sure to thoroughly water the treated area to activate the release of nutrients.**

### Flower Gardens

- Nutri-Rich is an excellent all purpose 100% natural organic fertilizer that will promote brilliant flowering and vibrant colors. Nutrient requirements vary based upon the type of flower and the season. You may want to consult a flower growing guide to determine appropriate application rates and the best time of year to fertilize your flowers.
- **Seeded flower gardens:** For each 100 sq. ft. of garden area, till or rake in 4 - 6 lbs. of Nutri-Rich fertilizer prior to planting - or for every 10 foot furrow till or rake in 1/2 - 1 lb. of Nutri-Rich fertilizer to a depth of 2-4 inches.
- **Established flowering plants, perennials, annuals:** For each 1 foot of plant height or width, top dress 1/8 - 1/4 lb. of Nutri-Rich fertilizer out to the foliage drip line.
- **After any application of Nutri-Rich for your flowering plants or garden, be sure to thoroughly water the treated area to activate the release of nutrients.**

### Shrubs & Trees

- **Planting new shrubs & trees:** Sprinkle 1/8 - 1/4 lb. of Nutri-Rich fertilizer in the bottom of the hole and cover with 2-3 inches of soil. For every 1 foot of shrub or tree height, mix 1/8 - 1/4 lb. of Nutri-Rich fertilizer with soil used to fill and pack around the root ball.
- **Established shrubs & trees:** For each 1 foot of shrub or tree height or width, top dress 1/8 - 1/4 lb. of Nutri-Rich fertilizer out to the foliage drip line.
- **After any application of Nutri-Rich for your shrubs or trees, be sure to thoroughly water the treated area to activate the release of nutrients.**

### Turf

#### New Turf Seeding

- After leveling and rolling, prior to planting seed, broadcast 40 lbs. of Nutri-Rich fertilizer for each 2000 sq. ft. of ground.
- **Optional:** To better build your soil base, prior to the step listed above, for each 2000 sq.ft. till or rake 40 lbs. of Nutri-Rich fertilizer to a depth of 2 inches.

#### New Sod

- After leveling, broadcast 40 lbs. of Nutri-Rich fertilizer for each 2000 sq. ft. of ground.
- **Optional:** To better build your soil base, prior to the step listed above, for each 2000 sq. ft. till or rake 40 lbs. of Nutri-Rich fertilizer to a depth of 2 inches.

#### Established Turf

- Many synthetic fertilizer manufacturers recommend 6-8 week application intervals. Nutri-Rich's slow release characteristics allow you to fertilize less frequently and still achieve a long lasting, deep, and lush green.
- **Spring:** Broadcast 40 lbs. of Nutri-Rich fertilizer for each 2000 sq. ft. of turf.
- **Summer:** Broadcast 40 lbs. of Nutri-Rich fertilizer for each 2000 sq. ft. of turf.
- **Fall:** Broadcast 20-40 lbs. of Nutri-Rich fertilizer for each 2000 sq. ft. of turf.
- **Winter:** Broadcast 20-40 lbs. of Nutri-Rich fertilizer for each 2000 sq. ft. of turf.

#### Brown or Yellow Turf Spots

- Broadcast 2 lbs. of Nutri-Rich fertilizer for each 100 sq. ft. of brown or yellow turf.

**After any application of Nutri-Rich for new or established turf, be sure to thoroughly water the treated area to activate the release of nutrients.**
